DETAILED ACTION

Allowable Subject Matter

Claims 21-22, 24-26 and 28-32 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches a method of x-ray inspection of a vertical section of a sample by swinging a x-ray detecting device in translational motion about a vertical straight line as an axis, the vertical straight line lying in a plane of the vertical section of the sample while maintaining an incidence plane of the x-ray detecting device parallel to the vertical section of the sample, and applying x-rays to the sample with the x-ray source while rotating the x-ray source about the straight line in synchronization with said swinging of the x-ray detecting device as claimed in independent claim 21.

Claims 22 and 24 are allowed by virtue of their dependency.

None of the prior art teaches an x-ray inspection apparatus having an x-ray detecting device to produce a vertical section image of a sample, said x-ray detecting device having an x-ray incidence plane arranged to be parallel to a vertical straight line, a swinging means for swinging said x-ray detecting device in translational motion about the straight vertical line as an axis while the x-ray incidence plane is maintained facing in the same direction, and a rotating means for rotating said x-ray source about the vertical straight line as an axis of rotation in synchronization with said x-ray detecting device as claimed in independent claim 25.

Claims 26 and 28-32 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
